**Without measurement, there is no control.**

## RENTAL PROGRAM

Are you looking for a particle counter or molecular contamination monitor for a short-term project or troubleshooting job?

Particle Measuring Systems has the right equipment, the technical support, and a comprehensive rental program to meet your needs.

### Benefits of Renting

- Most cost-effective solution for short-term projects
- Frees up capital for other expenditures and converts fixed costs to variable costs
- No concerns with maintenance, calibration, or cost-of-ownership
- Same great technical support from Particle Measuring Systems

### Rental Program Details

Rental periods are on a monthly basis beginning when the customer receives the equipment. Most equipment manufactured by Particle Measuring Systems is available for rental, subject to availability.

- All rented equipment is calibrated per ISO 9001 work instructions
- All equipment is fully warranted during the rental period
- Appropriate accessories are included - manuals, power cords, cables, connectors, etc.
- Technical phone support is included with the rental
- On-site installation and training is an available option with each equipment rental

## LEASE PROGRAM

If you want to purchase, but do not have the budget, we offer lease programs to assist with the financing.

All Particle Measuring Systems equipment and software is available on a monthly lease program.\*

### Benefits of Leasing

- Conserves capital
- Flexible payment structure to fit your budget
- Upgrade, purchase, or renewal options are available at the end of your lease period
- Achieve return-on-investment while you pay off the equipment

### Lease Programs Available

Two types of leases are offered; the primary difference is the purchase option at the end of the lease.

#### \$1 Buyout Lease

At the end of the lease, the customer may purchase the equipment for \$1. With the low buyout price, this lease program essentially gives you lease-to-own financing.

#### Fair Market Value (FMV) Lease

At the end of the lease period, you may purchase equipment for its current fair market value or return the equipment to Particle Measuring Systems at no extra charge. This program provides the lowest monthly payment and more options at the end of the lease.

\* Software and low volume instruments are not eligible for the FMV Lease

ISO 9001:2000  
FM 40574

Registration applies to the Boulder, Colorado facility
